Anzia Yezierska, Sweatshop Worker, Whose Stories of New York's East Side Workers Lifted Her to Fame as a Brilliant Author, Tells How City Claims Forever Those Whom It Receives.

By Marguerite Mooers Marshall.

16 NEW YORK is a city of hungry hearts. They are hungry for love, for power, for education, for advances. Every true New Yorker, whether native or foreign born, is hungry for something, is reaching for something just beyond the grasp. That is why I would rather live in New York, even in a little tenement room, than in the midst of the most beautiful landscapes anywhere else in America. New York is ALIVE—because it forever aspires and is forever unsatisfied."

Her blue eyes shining, her softly rich tones husky with emotion, Anzia than those of the usual "noted visitor." Yezierska, the Russian Polish sweatshop worker whose powerful book of days, tosses an admiring adjective or short stories, "Hungry Hearls," caused two and goes his way. It is fifteen her to be hailed as "the Zangwill of the east side" at the time of its publication a few months ago, told me what our city means to her, and why "new Americans" from overseus caunot be allured elsewhere, once New York is in the blood.

Some Long-Felt Wants By Neal R. O'Hara.

If You Want to Die Rich and Refined, Just Invent Something New, Such as a Rainproof Complexion or a Welcomeless Doormat-Opportunity Is Knocking Like the Engine of a Flivver.

O matter what Harvey says about this country, it's a neat place of residence for a guy with brains. For every flivver engine that knocks once, Opportunity does it twice. There are ways of making money on all sides and both bips. No one in this land has to have credit at the delicatessen store. Not while there are so many inventions waiting to be invented.

Think of the things to be devised for the public! Doormats without ing one's self. That's why there's any "Welcome" on them. Cigarettes such a demand for the I-less kindwithout coupons. And, of course, because it's impossible, perpetual motion. Nobody ever dis-

If you want to die rich and refined, just invent something new. But make something useful! Don't be like Herman Gubb, who invented the petticoat in 1871, got rich and famous in later years and died a pauper in 1920.

Why should scientists spend millions trying to attract Mars's attention when there is more important work to be done at home?
